VAL-MATIC'S BUTTERFLY VALVES

How many things these days have been around since 1971 and are still going strong? Val-Matic's American-BFV® Butterfly Valve is one of those rarities. Proven dependable in thousands of field installations in municipal, industrial and power applications throughout the world. These highly engineered valves feature a standard epoxy interior, continuous uninterrupted seating and Tri-Loc™ seat retention system, which allows for field adjustment/replacement without the need for special tools or epoxies. The ductile iron disc adds strength allowing the disc to have a smaller cross section providing improved headloss characteristics. Stainless steel taper pins are designed to utilize tangential forces to provide the most secure method available of locking the disc to the shaft for strength and rigidity. For more information on Val-Matic's American-BFV® Butterfly Valve visit www.valmatic.com.

About Val-Matic

Val-Matic Valve and Manufacturing Corporation's headquarters is located in Elmhurst IL with additional manufacturing facilities in Addison, IL. Val-Matic is a leading manufacturer of Air Valves, Check Valves, and Quarter Turn Shut-Off Valves for water/wastewater, power, industrial, fire protection and HVAC applications.
