VAL-MATIC QUADROSPHERE® BALL VALVES

Val-Matic has a series of QuadroSphere® Application articles available on Fly Ash Disposal, Pipeline Pigging System, Compounds in Chemical Process and Salt Dome/Cavern Storage. The articles include background about the project, the problem, and the solution from using a QuadroSphere® Ball Valve. The QuadroSphere® Ball Valve has a unique contoured ball design which allows media to flow around the ball and aids in flushing out the ball cavity thus making it a smart choice for these tough applications that have substances that can cause build up and damage a typical ball valve. For more details on these articles visit www.valmatic.com.
